QUANTUMS3
Designing Beyond the Bounds of Engineering

Quantum WDC Services (Web Development Consulting Services)

Quantum uses powerful and user friendly open source Content Management Systems to build sites that are dynamic, functional and easy to maintain for groups of non-technical staff members or volunteers.

Quantum websites can usually include any feature you can find on any other website. We can work on a flat fee or hourly rate to accommodate any budget.
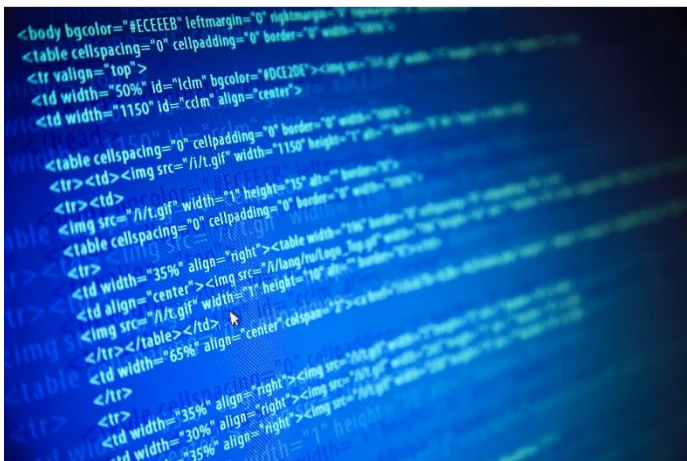

The objective of our WDC service line is to drive every client's long-term web-based technology costs as close as possible to ZERO within six months of starting a project. We accomplish this goal by:

1. Using Award Winning Free and Open Source Software
2. Replacing Paid Subscription Systems with Free Site-based Systems
3. Using Award Winning User Friendly Content Management Systems
4. Empowering Clients to Manage Their Own Site on a Day to Day Basis
5. Providing support on an as-needed basis at an hourly rate
